DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Species 1 in the reply filed on 7/25/05 is acknowledged. Examiner agrees with Applicant that claims 1-5 and 17-19 are generic and that claims 1-6, 8, and 17-19 read on Species 1. However, it is the Examiner's position that claim 7 does not read on Species 1. Claims 7, 9-16, and 20 are therefore withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Species, there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 8, and 17-19 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,478,045 (Ausman).

The Ausman reference discloses a valve comprising a body (198 and 232), a fluid passage 264, an axial bore 260, a movable member 204, an actuator 88, and a first vent passage which vents leakage fluid (passage check valve 208 is in, see col. 22, lines 12-15). Regarding claim 2, movable member 204 has a valve element portion (end of element 204 which closes passages 262 and 264 during pumping). Regarding

claim 3, the valve further comprises a second vent passage (vent passage connected to and at a right angle to the first vent passage, see Figure 3). Regarding claim 4, the valve further comprises annular portions 196 and 200. Regarding claim 6, the valve further comprises spacer 32 with drain passage 168 (see col. 9, lines 5-10). Regarding claim 8, the valve is a solenoid and therefor electromagnetically actuated (see col. 3, lines 20-25). Regarding claims 17-19, the claimed methods are inherently performed during the normal use of the Ausman device.
